### ► Smart. Compact. Bluetooth Technology.

**MSSC Smart-Jet Blue Inkjet Printers** are compact and reliable and can be controlled wirelessly, with no router needed, via bluetooth technology. This power house coder prints on porous and non-porous surfaces and can print bar codes, QR codes and logos. A large display screen makes it easy to read and simple to operate.

#### **Smart-Jet Blue Wireless Inkjet Printer Features:**

- One to six lines of print
- Large, color screen rotates with printer
- PC and smart phone connectivity with Smart-Jet Blue software and app

### Additional Features:

- Control printer via Bluetooth with smart phones and tablets using Android operating systems
- Prints on both porous and non-porous surfaces
- No moving parts and maintenance-free
- High-resolution characters
- Plug and print with HP 2.5 cartridge technology
- Prints high-quality bar codes, QR codes, logos
- Anti-shock mounting mechanism adjusts to irregularities in box for consistently smooth and high-quality printing results
- PC capability and connection via USB allows you to print database information
- Dynamic bar codes can create a unique number for each individual product
- Stand alone operation with wireless keyboard

Redesigned Printer Head

App works on Android

HP TIJ 2.5 technology

Porous and non-porous print

### Compact and Smart Design

- Dimensions (L x W x H): 4.24 x 2.95 x 3.27 (in) or 108 x 75 x 83 (mm)
- Lightweight: Approximately 1 lb. (excluding cartridge)
- Anti-shock mounting mechanism for printer protection
- Display: Automatic rotation 2.8" 256K colors TFT LCD display
- Power supply: AC 100 - 240V, 50/60 Hz
- Maximum power consumption: 48 watts
- Plug and print with HP 45 ink cartridge (Hewlett Packard TIJ 2.5 inkjet technology)
- Throw Distance: Up to 0.25 in (6 mm)
- New stronger and smaller skid plate design

### Standard Features

- Bluetooth connection via smartphones and tablets using Android systems
- Stand-alone operation with wireless USB keyboard or with PC control
- AUX I/O port for external photo-sensor, encoder, and/or alarm kit connection

- USB 2.0 port for operating with PC
- Built-in and adjustable photo-sensor
- Nozzle switching and self-cleaning capabilities to extend cartridge lifetime
- Store up to 100 messages on printer's memory
- Password protected
- Multi-function PC software for synchronized control and message management
- Automatic recognition of inks (aqueous or solvent) and application of appropriate printing parameters
- New cartridge slot design for easier insertion and removal
- Hot-swap: Circuit protection for quick cartridge changeover
- Real time reporting to Android devices

### Printability and Speeds

- Menu languages: English (default), Chinese, French, German, Spanish, Finnish and Portuguese
- Alphanumeric characters, 4 logos, date/time, expiration date, Julian date, shift code, counter/lot box code, multiple types of variable barcodes and database

- Printable characters: Windows true fonts with PC
- Print up to 6 lines from 0.07 - 0.5 in (1.7 - 12.7 mm)
- Print speed: max 76 m/min at 300 x 300 dpi
- 5 levels of optical density
- Up to 150 characters per line

### Inks and Accessories

- Black water-based ink for porous media (available in 42 or 400 ml)
- Solvent inks for semi- and non-porous media (available in black, red, or blue)
- Standard mounting bracketry and hardware included for printer

### Operating Temperature

- Operating temperature between 41° F - 122° F (5° - 50° C)

### Warranty

- 12 month warranty for all equipment excluding consumables
